PROFESSIONAL SUMMARY

Frontend Developer with a background in graphic design, focused on building clean, responsive, and maintainable web applications with React, TypeScript, Tailwind CSS, and modern frontend architecture. Strongest in UI structure, reusable components, authentication flows, state management, accessibility, responsive interfaces, and product-oriented web experiences. Building full-stack experience through project work with Next.js, Express, PostgreSQL, Redis, Docker, Nginx, and Socket.IO.

TECHNICAL SKILLS

Frontend:	React, TypeScript, JavaScript, Next.js, Tailwind CSS, HTML, CSS, Sass, Bootstrap
Backend / Full-Stack:	Node.js, Express, PostgreSQL, Prisma, Redis, REST APIs, Zod, Socket.IO
Tools:	Docker, Docker Compose, Nginx, Git, GitHub, GitHub Projects, Postman, Jest, Puppeteer, Storybook
Design / UX:	Figma, Adobe XD, Illustrator, Photoshop, responsive design, accessibility, SEO, UI/UX, design systems

EXPERIENCE

Frontend Developer - Freelance

Upwork

Remote / USA | May 2022 - July 2025

- Refactored a business web application from vanilla JavaScript to React, improving maintainability, component structure, and long-term scalability.
- Built reusable UI components for invoice, estimate, and job-tracking workflows.
- Implemented custom invoice views, custom invoice templates, and PDF printing functionality for a client-facing business tool.
- Improved code maintainability by separating UI logic into clearer component-based structures.
- Translated client requirements into frontend features, UI flows, reusable components, and testable delivery items.
- Used Kanban, GitHub Projects, Postman, Puppeteer, and Jest to organize, test, and validate work.

Client feedback: "Carolina is the needle in the haystack. Her skills, cooperation and communication exceeded my expectations."

Web UI Developer

Psiware

Argentina | July 2020 - August 2022

- Worked on web UI development for institutional websites, landing pages, product catalogs, and product pages.
- Translated client requirements into responsive UI solutions aligned with business needs and user expectations.
- Created wireframes and high-fidelity mockups using Figma, Adobe XD, Illustrator, and Photoshop.
- Acted as a bridge between design agencies and development teams, evaluating design feasibility and improving implementation quality.
- Researched UI patterns and frontend approaches using HTML, CSS, JavaScript, Sass, Bootstrap, React, and Vue.
- Improved frontend quality by considering performance, SEO, accessibility, and cross-browser compatibility.
- Worked in agile workflows using Scrum, Kanban, GitHub, and Atlassian tools.

Selected Project & Education

SELECTED PROJECT

Transcendence - Full-Stack Real-Time Web Platform 42 Barcelona | Tech Lead / Frontend & Full-Stack Developer

Team project

Repository: <https://github.com/42-BCN/Transcendence>

Stack: React, TypeScript, Next.js, Express, PostgreSQL, Prisma, Redis, Socket.IO, Docker, Docker Compose, Nginx, Tailwind CSS, Storybook, i18n

- Contributed as Tech Lead to project architecture, frontend structure, technical standards, and documentation.
- Worked on authentication and account flows, including protected routes, profile management, email verification, password recovery, and Google OAuth integration.
- Built and improved social features including profiles, friendship workflows, presence integration, direct messaging, and game room invitations.
- Contributed to real-time interactions using Socket.IO, including live presence, direct message updates, and invitation state synchronization.
- Worked on Docker/Nginx setup, environment configuration, local HTTPS, and containerized development workflows.
- Supported internationalization and reusable UI architecture across the frontend.

EDUCATION

42 Barcelona

Software Engineering Program | In progress

Project-based software engineering program focused on peer-to-peer learning, problem solving, code reviews, systems programming, algorithms, and full-stack web development.

Acamica + Globant

Full-Stack Web Development Scholarship | 2019 - 2020

Studied web development fundamentals including HTML, CSS, JavaScript, Node.js, MySQL, and API-based projects.

Coderhouse

UI/UX Design | 2020

Studied UI/UX design principles, digital product design, and interface design workflows.

Escuela Superior de Diseño de Rosario

Visual Communication / Graphic Design | 2011 - 2015

Focused on web design, typography, color theory, layout, visual systems, and production-ready design assets.

LANGUAGES & ADDITIONAL BACKGROUND

Spanish - Native/Bilingual | English - Professional Working

Graphic design background with experience in visual communication, UI/UX, layout, typography, and design tools. Able to bridge visual quality, user experience, and frontend implementation.
